TIGER Drylac®
Powder Coatings

Dormant Transparent and Clear: Dormant Transparents are applied as the base coat in this system. The flamboyant shades of color will not evolve until a clear topcoat is applied. Samples in this chart, all top coated with our Glossy Clear (49/00530) are just a few of the many variations of attractive finishes that can be achieved by top coating with a variety of our Clears and Glitters. Choices:

Clear Coatings available:

- Clear Glossy 39/00020
- Clear Glossy 49/00530
- Clear Semi Gloss 49/00280
- Clear Matte 16/00030
- Clear Ice Matte 69/00300
- Clear Rough Texture Glossy 89/00200

Glitter Coatings available:

- Gold 49/00310
- Silver 49/00320
- Red 49/00330
- Blue 49/00340
- Green 49/00350
- Twilight 49/00390

Textures and Matte Finishes: An assortment of textured and matte finishes (not shown in this chart) is available in numerous RAL colors for interior and exterior applications. Finishes include matte, semi gloss, fine texture, rough texture glossy and rough texture matte. Please check with your local Tiger Drylac office for availability and brochures.

Standard Product Catalog: For a summary listing of all other colors and finishes available please refer to our Standard Product Catalog.

Notes

Colors and textures have been matched as closely as possible. Paper and ink limitations as well as influence of heat and light account for differences from actual coatings. To aid in final product selection please contact your local Tiger Drylac office for a powder-coated Q-Panel of the product of your choice.

Datasheets: Periodically updated datasheets, showing cure parameters, test results, pretreatment information and more are available for all products in this chart. Please contact your local Tiger Drylac office for the latest version.

Custom Colors: Should our vast selection of standard finishes not be exactly what an application calls for, we will be happy to provide custom colors (220 lb minimum order) with quick 7 to 10 day turn around times.

Fluorescent: 1- and 2-coat fluorescent finishes have limited UV stability.

Hammertones: Series 39 Hammertones are suitable for exterior applications. Film thickness guidelines must be observed. Series 09 as well as Series 89 low/fast cure Hammertones are for interior applications.

Antico: For that out-of-the ordinary look, simulating natural stone and oxidation of copper, exterior grade Anticos can provide a decorative finishing solution.
